- Achieved promotion from intern to junior software developer within 2 months due to outstanding performance and contributions.
- Took charge of project ownership, ensuring timely delivery and surpassing expectations. Successfully led the completion of 3 major projects.
- Enforced over 20 frontend features, leveraging Angular's capabilities to optimize user experience and enhance performance.
- Improved project performance by 30 percent through optimizing API calls and enhancing data handling in Angular applications.

## Certifications

---

**Kodnest** Aug 2022 – Dec 2022  
Java Full Stack Development, Bangalore, India

## Education

---

**Sri Krishna Aditya College of Arts and Science** June 2019 – May 2022  
BS in Computer Science, Coimbatore, India

- **Cumulative GPA:** 7.7/10

## Projects

---

### Digital Legacy Management App

- Incorporated a secure platform for organizing and managing personal, financial, and estate planning information, serving over 10,000 users with 99.9% uptime.
- Ensured secure storage with role-based access, boosting frontend performance by 10% through code optimization.

### Global Mining Projects Explorer

- Incorporated an interactive platform displaying global mining sites with map and list views for enhanced usability.
- Improved complex filtering, optimized UI experience by 15%, and reduced API calls while maintaining high standards.

### Token Exchange and Crowd Sale D-App

- Built a decentralized token exchange with Web3 integration and wallet connectivity (MetaMask).
- Implemented a vesting concept for secure and structured token distribution.

### NFT Marketplace

- Developed a decentralized marketplace for buying, selling, and trading digital assets with smart contract integration.
- Enforced wallet support and bidding options for borrowing and lending NFTs.

### Agora Social Media and DEX Platform

- Engineered a decentralized platform from the ground up, integrating social media features and a token exchange, facilitating seamless asset trading for thousands of users.
- Implemented multi-factor authentication, allowing login via phone number or blockchain wallet, enhancing security and accessibility.
- Coordinated with international developers across multiple time zones, streamlining cross-border collaboration and feature rollouts.

### Lulu CRM

- Built interactive dashboards and data tables, visualizing sales metrics across multiple parameters for real-time business insights.
- Integrated SOAP calls from SAP services in Node.js, optimizing data retrieval and reducing response times by 30%.
- Handled microservice-based authentication, securing user access while supporting scalability for enterprise operations.
